

## ✦ Project Overview

This project is a simple and clean dashboard webpage created using **HTML** and **CSS**. It contains two main parts:

1. A dashboard card section that displays features visually.
2. A user records table that shows structured user information.

The design focuses on simplicity, clarity, and user-friendly layout.

## ✦ Features

- ☐ Interactive dashboard cards
- ☐ Hover effects on cards and buttons
- ☐ Structured user table
- ☐ Clean and modern interface
- ☐ Fully responsive layout using Flexbox
- ☐ Uniform images and organized spacing

## ✦ Introduction

This project presents a basic dashboard layout that can be used in admin panels, management systems, or web applications. It aims to create a neat and structured interface that displays information clearly.

## ✦ Objectives

- ☐ Create a user-friendly dashboard interface
- ☐ Display features in card format
- ☐ Present user data neatly using a table
- ☐ Implement CSS styling for spacing, colors, and animations

## ✦ Webpage Structure

### 1. Dashboard Heading

- ☐ The page begins with a centered title “**Dashboard Overview.**”
- ☐ It is underlined to emphasize the main section.

### 2. Feature Cards Section

A row of three feature cards is displayed below the main heading. Each card includes:

- ☐ An image
- ☐ A title
- ☐ A short description
- ☐ A button

The cards represent key functions like **Users**, **Reports**, and **Analytics**. Hover effects include:

- ☐ Color change
- ☐ Upward movement
- ☐ Shadow effect for 3D appearance

Button colors also change when hovered.

### 3. User Records Heading

A second centered and underlined heading “**User Records**” introduces the table section.

### 4. User Records Table

A structured table displays user information with columns:

- ☐ ID
- ☐ Name
- ☐ Email
- ☐ Role
- ☐ Status

The table includes:

- ☐ A highlighted header row
- ☐ Clear spacing
- ☐ Borders between rows
- ☐ Shadow effect for visibility

Each row represents a single user.

## 📌 CSS Styling

The design uses various styling techniques:

- ☐ Clean font and white background
- ☐ Flexbox for arranging cards
- ☐ Borders and rounded corners for cards
- ☐ Hover animations on cards and buttons
- ☐ Fixed image size for uniform layout
- ☐ Table shadows and spacing for clarity.

## 📌 Conclusion

This dashboard project effectively uses HTML and CSS to create a well-structured, visually appealing webpage. It demonstrates:

- ☐ Clean layout design
- ☐ Interactive effects
- ☐ Organized data display

The project can be improved further by adding:

- ☐ Navigation bar
- ☐ Login system
- ☐ Dark mode
- ☐ Database connectivity

### Dashboard Overview

**Users**  
Manage Registered Users and view data.
