

## **Step 4 – Course Details Form**

---

### **1. Title**

Course Details Form (Step 4)

---

### **2. Purpose**

- To select the course chosen by the student.
  - To select the duration of the course.
  - To move to the next step of the form.
- 

### **3. Description**

- The page displays a **Course Details** section.
  - Two dropdown fields are provided:
    - Course Name
    - Course Duration
  - A **Next** button is given to continue to the next page.
- 

### **4. Technology Used**

- HTML
  - CSS
- 

### **5. Program Logic**

- The form layout is created using `<div>` tags.
- `<select>` elements are used to choose course details.
- CSS is used to control width, spacing, and alignment.
- The **Next** button uses a link to open the next page.

---

## 6. Working

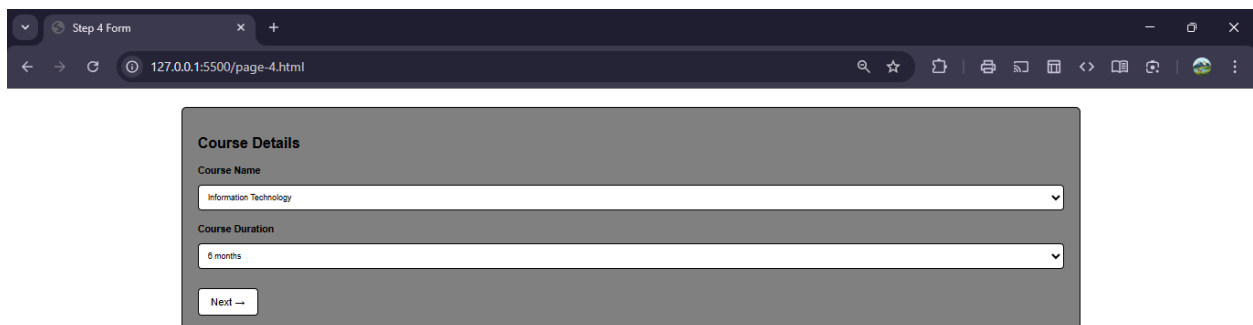

1. Page loads in the browser.
  2. Course name and duration dropdowns are displayed.
  3. User selects required options.
  4. Clicking **Next** opens `page-5.html`.
- 

## 7. Limitation

- Selected data is not stored.
  - No validation is applied.
  - Used only for form layout.
- 

## 8. Conclusion

This page creates a simple course selection layout using HTML and CSS. It is intended for design practice, not for data submission.

The screenshot shows a web browser window with a single tab titled "Step 4 Form". The address bar displays "127.0.0.1:5500/page-4.html". The browser interface includes standard navigation buttons (back, forward, refresh) and a search bar. The main content area displays a form titled "Course Details" with a dark gray background. The form contains two dropdown menus: "Course Name" with "Information Technology" selected, and "Course Duration" with "6 months" selected. Below the dropdowns is a "Next →" button.
