

About page Documentation.

- This page is created to introduce RS SOFT TECH and build trust with visitors.
- The document starts by telling the browser to treat the page as a modern web page so it displays correctly everywhere.
- Language information is provided so search engines and assistive tools understand the content properly.
- Character settings ensure that all letters, symbols, and text appear correctly without errors.
- Screen-size settings make sure the page adjusts properly on mobile phones, tablets, and desktops.
- The page title helps users identify the page in the browser and improves visibility in search results.
- Styling is kept in a separate file so design and structure remain clean and easy to maintain.
- A navigation area is placed at the top to help users move between different pages of the website easily.
- The main heading clearly states what the page is about and strengthens branding.
- A short description under the heading explains the purpose of the institute in simple words.
- Content is divided into multiple logical sections so users can scan information quickly.
- One section explains the background of the institute and what it focuses on.
- Another section lists the services offered, making it easy for users to understand available courses and training.
- A dedicated area explains the institute's mission and long-term vision to show direction and values.
- Important keywords are emphasized to draw attention to key ideas.
- A separate section is used to show the institute's location visually for better understanding and credibility.
- An image is included to give a real-world reference instead of only text.

- A section explains why someone should choose this institute over others by highlighting strengths and benefits.
 - Bullet-style points are used to improve readability and clarity.
 - The bottom area of the page contains ownership information and a link to legal or policy-related content.
 - Overall, the structure is clean, easy to read, and user-focused.
 - The page is suitable for beginners but lacks strong proof points like results, numbers, or achievements, which reduces its impact.
