1. Purpose of the Page

This page is created to allow users to communicate with RS SOFT TECH by providing their contact details and message. It serves as a direct connection point between the institute and visitors.

---

2. Page Initialization

- The document is defined as a modern web page to ensure correct rendering across all browsers.
- Language information is specified to support accessibility tools and search engines.
- Character settings are applied to avoid text display issues.
- Screen scaling is configured to make the page responsive on different devices.

---

3. Page Identification

- The page title clearly indicates that this is the contact page of RS SOFT TECH.
- An external styling file is connected to control layout, colors, and spacing separately from content.

---

4. Navigation Section

- A navigation area is provided at the top for easy movement between pages.
- Links are included for home, about, and contact sections to improve user experience.
- This section ensures consistent navigation across the website.

---

5. Page Header

- A main heading clearly states the purpose of the page.
- A supporting line guides the user on what action to take next, reducing confusion.

6. Contact Information Section

- A dedicated area displays the institute's physical address.
- Phone numbers are provided so users can contact directly without filling the form.
- Important labels are visually emphasized for clarity.

7. User Input Section

- A structured form is used to collect information from users.
- Fields are provided for first name and last name to identify the user.
- An email field ensures valid contact details for responses.
- A phone number field allows alternate communication.
- A message area enables users to describe their query in detail.
- Mandatory input rules prevent incomplete submissions.
- A submission control allows users to send their information.

8. Footer Section

- The bottom section displays the institute name and year.
- Privacy-related text is included for professionalism and trust.

9. Overall Assessment

- The page is simple, clear, and user-friendly.
- The structure is suitable for beginners and small institutes.
- Functionally incomplete, as submitted data is not processed without backend integration.
- Lacks confirmation feedback after submission, which weakens user experience.

10. Conclusion

This contact page effectively collects user information and displays essential contact details. However, without server-side handling or response confirmation, it remains a static communication interface rather than a complete contact solution.
